

Veterinary Referral Form - Behaviour Cases

Current and previous medical conditions and treatments may contribute directly or indirectly to the development of behaviour problems. For this reason, veterinary involvement is crucial to eliminate organic causes to enable behaviour modification, and to ensure we have the whole picture when it comes to working with individuals. Working together to cover all bases is vital for overall success.

Please complete and sign this form to confirm your referral to We Teach Pets.

Client Name:..... Contact No:.....
